Setting of the IM limit

1. Role allocation for setting of IM limit

Only the authorized person who has the rights to user's account management, so called administrator, can allocate the role "Setting IM limit gas". The role "Správa vlastních údajů RÚT" and the activity "IM – Gas" has to be allocated to this person.

An administrator can allocate the role "Setting IM limit gas" to those users of a company who already got the activity of "IM - Gas" with the access type write "W".
