

**O****T****E** 

**Innovated solution for Gas IM**

**O****T****E**  **COM**

## Agenda

- 10:00 – 10:15 Welcome
- 10:15 – 10:45 Changes in IM
- 10:45 – 11:50 Trading Screen
- 11:50 – 12:20 Q&A
- 12:20 – 13:20 Lunch Break
- 13:20 – 14:00 Launcher Manager, IM limit
- 14:00 – 14:30 Q&A
- 14:30 – 15:00 Closing Speech – Next Steps

## How to ask questions?

Please, send them by email to : [spot-markets@ote-cr.cz](mailto:spot-markets@ote-cr.cz)

The questions will be answered during the dedicated sessions or by email after WS.

## Organized markets power

- **Block market** (since 1.2.2008)  
Continuous matching
- **Day-ahead market** (since 2002,  
Market coupling since 2009)  
Daily auction - Coupled with SK,HU  
and RO since 2014)
- **Intraday market** (since  
1.1.2004)
- **Balancing market with  
regulating energy**

## Organized markets gas

- **Intraday gas market**  
Continuous matching – since April  
2010)
- **Unused Flexibility market**  
ex-post market (2016)

The organized short-term market in the Czech Republic is an important form of electricity and gas trading. Due to significant liquidity growth in particular in the past years it provides market participants with a solid guarantee that they are able to purchase or sell the respective commodity even at short notice before the delivery date (day, hour) in response to the current situation in system or in their production or consumption portfolio. The objective and purpose of the short-term market is to reduce imbalance risk and to increase security and reliability of supply in both commodities.

## Volumes of traded gas and average prices on the intraday gas market in 2010–2017

In 2017, a total of 3,747 GWh was traded on the intraday gas market, representing an increase in the traded volume of 79.4% year-on-year and a new annual high.

**Total amount of gas traded on the IM from 2010 is more than 11 TWh.**

Number of active gas market participants is growing, there are approx. 100 gas market participants, including significant number of foreign companies.

# OTE Combining opportunities with markets

Innovated IM solution OTE-COM, developed by OTE, a.s., including an application for trading on Intraday Gas Market in the Czech Republic, allows quick response to the current market situation 365 days a year.

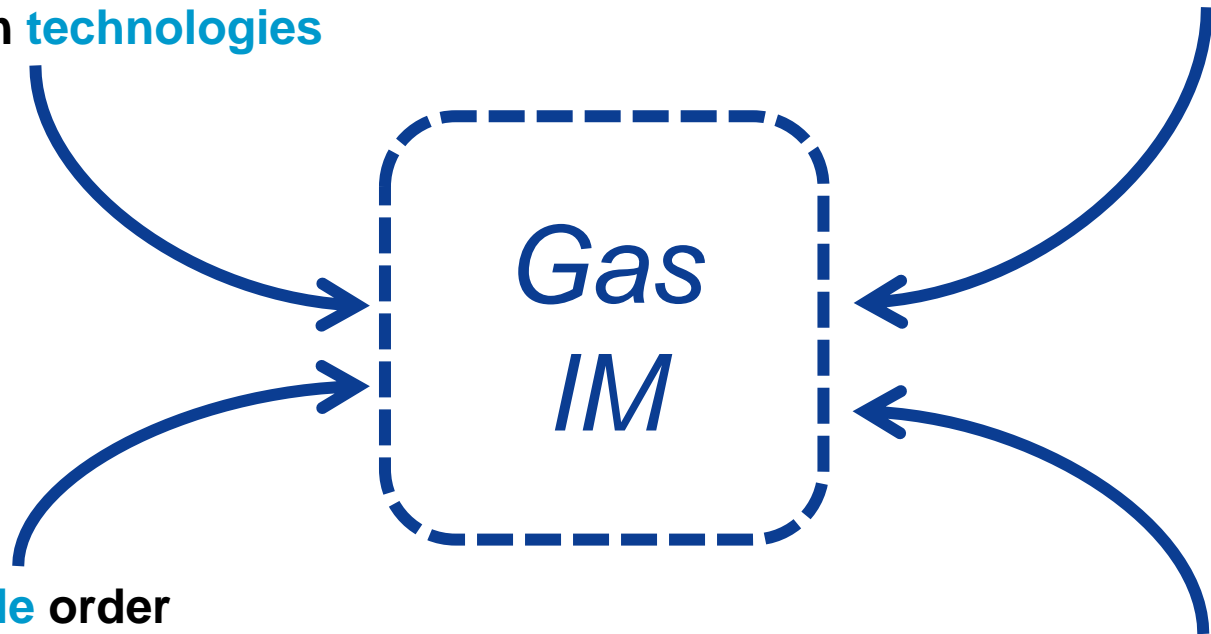

OTE has very good experience with similar application on Intraday Electricity Market.

New communication and application technologies

Adjustable GUI

Simple order management

New FS principle

# Implementation timeline

---

12/2017

- **Start of work on the innovated platform**

3-7/2018

- **Implementation and internal testing**
- **Publication of the interface specification**

8-9/2018

- **Testing with Market Participants**
- **Testing evaluation**

9/2018

- **Expected go-live 26.9.2018**

# OTE Testing with Market Participants

---

## - **Testing Period**

- from 27.8.2018 to 7. 9. 2018

## - **Organisation**

- The OTE-COM application and also AMQP automatic communication for the testing environment will be available on 10th August
- In case of automatic communications through the AMQP server, connectivity tests to be performed from 13th August 2018
- Individual testing by market participants
- On-call OTE support (phone, email)

## - **How to report the findings from the testing**

- Please, send them by email to : [spot-markets@ote-cr.cz](mailto:spot-markets@ote-cr.cz)

IM Information

**23. 7. 2018 Information about training for market participants**

Training for market participants will be held on 7. 8. 2018 (10:00 – 16:00) in form of webinar and serves for familiarization with the innovated trading platform for intra-day gas market, its functionalities and impacts on other parts of OTE system.

Presentations for the webinar will be screened in English and the word accompaniment will be in Czech.

The webinar will be run through the online Join.me application (<https://www.join.me/>).

If you are planning to participate in our webinar, we would like to ask you to give us know it by entering your email address in Doodle <https://doodle.com/poll/zw3uahs7iw7bc8g2>, which is anonymous for other participants.

The deadline for submitting contact information is until 3.8. 2018.

Access information (web link and information for audio connection VOIP and local phone numbers) will be distributed, together with related documents, not later than one hour before the beginning of webinar.

Test session for verification of participant's connection to on-line application will be opened on 6. 8. 2018 between 14:00 – 15:00. Access information will be distributed not later than one hour before the beginning of the Test session.

Test version of the OTE-COM application for connectivity tests of automatic communication or installation of client application, will be available for market participants approximately from 10. 8. 2018.

**21. 4. 2018 OTE-COM platform for Gas IM and schedule of implementation and workshop**

The presentation provides a detailed overview of functionalities and parameters of the OTE-COM platform including the expected

**The main changes of the trading on the Intraday  
gas Market (IM)**

## Products/Contracts/Orders

- IM products
- The types of IM orders
- The execution and time restrictions of IM orders

## User's settings

- Common user parameters
- Trade user parameters
- User parameters of order limits

# OTE Products/Contracts/Orders

- The logical schema: Product – Contract - Order

*Supported IM products:*  
- a daily gas product

- Time contract dependences on IM

# OPE Products/Contracts/Orders

---

- The order types
  - Limit order
  - Iceberg – total qty, peak qty, price delta. A peak qty is shown on the trading screen, automatic publishing another peak qty when the existing one is fully traded. A price of another peak quantity can be either the same or can be increased/ decreased by defined price delta value.
- The execution restrictions
  - FOK (Fill or Kill) – total order quantity shall be traded in one moment immediately after entering the system.
  - IOC (Immediate or Cancel) – any order quantity shall be traded in one moment immediately after entering the system.
  - None – an order can be traded immediately, or gradually, namely compared to one or more orders when creating one or more trades.

# OPE Products/Contracts/Orders

- The time restrictions
  - GFS (*Good for session*) – an order stays in the order book till the end of the relevant contact trading
  - GTD (*Good till date*) – an order stays in the order book till a specified validity time validity (date and time), if not fully traded.
- Order execution/ time restrictions allowed on the individual markets

<div style="background-color: #ADD8E6; height: 50px; width: 100%;"></div> <div style="background-color: #A9A9A9; height: 50px; width: 100%;"></div>	FOK	IOC	NON
Limit order	No time Restriction	No time Restriction	GTD or GFS
ICEBERG	No time Restriction	No time Restriction	GTD or GFS

## Common user parameters

- Settings of an application language (defaultly according to OS)
  - Czech/ English
- Settings of Number and Date/Time items formats – for English
  - Decimal symbol (defaultly „dot“), Digit grouping symbol (defaultly „comma“)
  - Short Date/Time (for example „7/4/2016“/„04:10 PM“)
  - Long Date/Time (for example „Monday, July 04, 2016“/„16:10:09“)
  - First day of week (defaultly „Sunday“)
- Settings of Number and Date/Time items formats – for Czech
  - Decimal symbol (defaultly „comma“), Digit grouping symbol (defaultly „gap“)
  - Short Date/Time (for example „4.7.2016“/„16:10“)
  - Long Date/Time (for example „4.července 2016“/„16:10:09“)

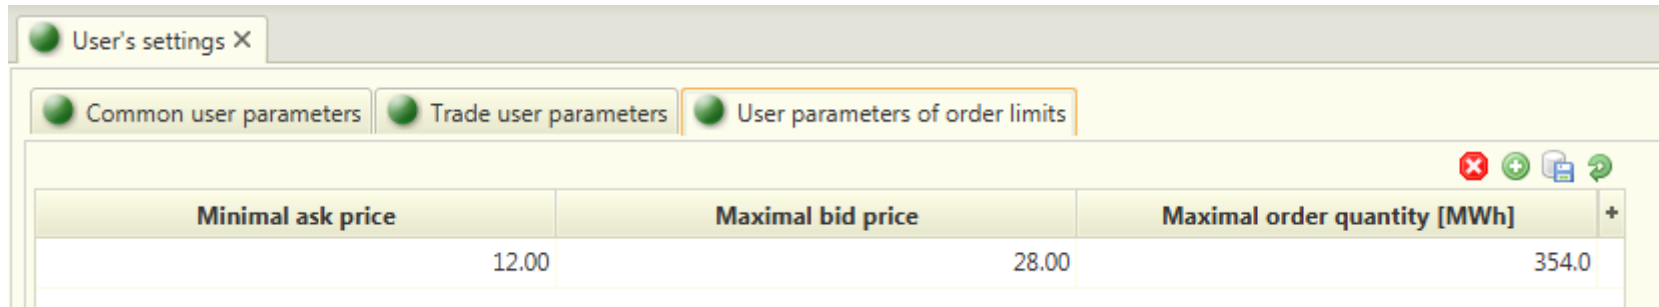

## Trade user parameters

- Action confirmation (used for a confirmation of the order actions: create/modify, activate/deactivate, delete)
  - Default value: „allowed“
- Auto save of a screen layout
  - Default value: „allowed“ – all user's changes of layouts settings are saved
- Orders deactivation after a client disconnection
  - Default value: „disallowed“
- Orders deactivation due to a client inactivity
  - Default value: „disallowed“
- Timeout for disconnection when idle
  - Default value: 30 min
- Sound notification of own IM gas trade
  - Default value: „allowed“ (Windows Notify Email.wav)

# OPE User's settings

## User parameters of order limits

- Minimal bid price [Eur/MWh]
- Maximal ask price [Eur/MWh]
- Maximal order quantity [MWh]

Minimal ask price	Maximal bid price	Maximal order quantity [MWh]	+
12.00	28.00	354.0

# The concept of trading screen

---

- Saving the trading screen layout by the user (in case of adjustment)
- Detaching the trading screen out of application window
- Quick order creation (using hot keys CTRL+1/ CTRL+2)
- Quick reaction on current orders on Market overview (using the button „*Accept order*“ ), not available for own orders
- The custom layout definition (using predefined layout templates and panes)
- Displays the current FS status (in currency CZK/EUR)
- Setting the IM settlement currency

# OTE Contract detail pane

- Displays all active orders related to the contract selected in *Market overview* pane
- Own orders distinguished by red color
- Automatic pane refresh (based on the selected contract)
- Bid/ Ask: weighted average price, qty, aggregated qty, price
- Contract detail:
  - bids are sorted according to price in descending order
  - asks are sorted according to price in ascending order

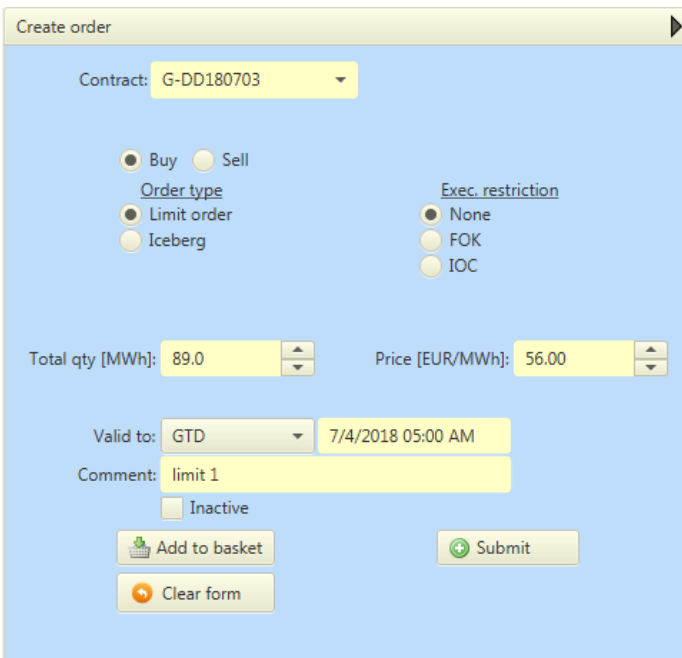

Contract detail: G-DD180710

Bid				Ask				+
WAPrice	AgrQty	Qty	Price	Price	Qty	AgrQty	WAPrice

# OTE Create order pane

- Submits bids/ asks related to the selected contract to the system
  - Limit order – total qty, price, time and execution restriction, inactive flag
  - Iceberg – total qty, price, peak qty, price delta, time and execution restriction, inactive flag
- Adds bid/ ask to the basket
- Market participant may create inactive bid for **issued**/ opened contract
- Quick bid/ ask creation (using hot keys CTRL+1/ CTRL+2)

## Limit order

The screenshot shows the 'Create order' pane for a Limit order. The contract is G-DD180703. The order type is 'Limit order' (selected). The execution restriction is 'None'. The total quantity is 89.0 MWh and the price is 56.00 EUR/MWh. The valid to date is 7/4/2018 05:00 AM. The comment is 'limit 1'. There is an 'Inactive' checkbox. Buttons include 'Add to basket', 'Submit', and 'Clear form'.

# OTE Trading history pane

- Displays the progress of traded quantity/ prices related to the selected contract
- Automatic pane refresh (after trade creation)
- Data zoom
- Additional trade information (price, quantity, trade timestamp) displayed in the tooltip

# OTE Own orders pane

- Displays all active/ inactive orders related to the selected contract
- Automatic pane refresh (based on the contract selected in *Market overview* pane)
- Operating items:
  - *FS status* - detection of current off-line limits of the participant
  - *Activate / Activate all* - activation of selected inactive orders/ all inactive orders
  - *Deactivate / Deactivate all* - deactivation of selected active orders/ all active orders
  - *Delete / Delete all* - deletion of selected orders/ all orders
  - *Modify* - modification of selected order
  - *Basket* - opens window for the mass order maintenance
  - *Settl. curr.* – setting of currency settlement for the given delivery day

---

# Q&A

## Obědová pauza

Vážení účastníci,

webinář začne znovu po  
obědové pauze ve

13:00

## Lunch break

Dear participants,

the webinar continues  
after the lunch break at

1:00 pm.

*LauncherManager*

*Risk Management – IM*

(Risk management IM limit)

- Launcher Manager
- What is changing in Risk Management?
- Setting IM limit via WebGUI
- Order's lifecycle:
  - New
  - Modification
  - Cancel
  - Trade – Fully accepted order
  - Trade – Partly accepted order
  - Reports
- Setting IM limit via SOAP communication
- Transfer financial resources from IM limit to main trading limit

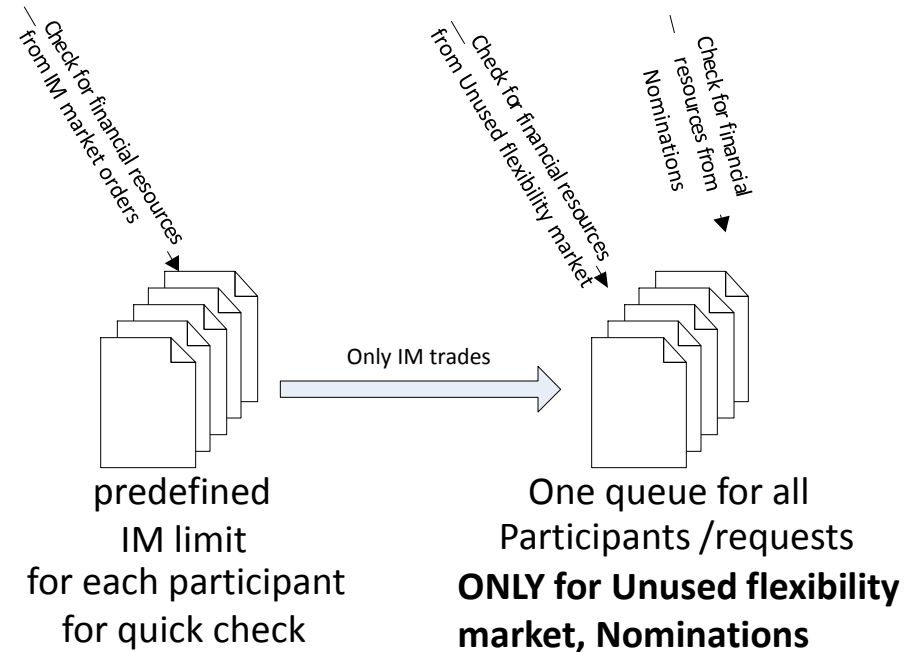

# What is changing in Risk Management

## Current situation

## New situation

# Setting IM limit via WebGUI

- Setting IM limit by external user with role („Nastavení VDT limitu plyn / Setting IM limit gas“)
- Each **Balance Responsible Party** has to confirm with **OTE IM limit**
- **User with administrator rights (Authorized persons) in CS OTE** can configure **access rights and roles of another users**

Assigned	Role name
<input checked="" type="checkbox"/>	Možnost výběru výchozího certifikátu při podpisu
<input checked="" type="checkbox"/>	Nastavení VDT limitu plyn / Setting IM limit gas
<input type="checkbox"/>	Nastavení VDT/VT limitu / Setting IM-BalM limit
<input checked="" type="checkbox"/>	Notifikační lišta mimořádných událostí

### New limit IM setup

Current total limit	200,000,000.00
Current disposable amount	176,283,507.32
Current IM limit	1,963,236.00
Current disposable amount IM	1,963,236.00

    <Limit type="VDP" value="15000" moved="5000" free="1280"/>
  </Limits>
</SFVOTLIMITCHANGE>
```

- SFVOTLIMITCHANGE/Limits@trade-date – delivery date
- SFVOTLIMITCHANGE/Limits@trade-id – trade id
- SFVOTLIMITCHANGE/Limit@value – new value of IM limit in CZK
- SFVOTLIMITCHANGE/Limit@moved – financial resources transferred from IM limit to online in CZK
- SFVOTLIMITCHANGE/Limit@free – disposable financial resources in IM limit in CZK

# Q&A

# Summary and Next steps

# OTE The most important changes of IM

---

## Terminology

- Instead of the term **Product**, the term **Contract** will be used
- Instead of **Contracts number**, the quantity will be set in **MWh**

## Orders

- Along the Limit order, it will be possible to use an **Iceberg** order
- New execution restrictions **IOC** (Immediate or Cancel) and **FOK** (Fill or Kill) will be added
- A new time restriction **Good Till Date** (GTD) will be added to the current time restriction **Good for trading session** (GFS)
- It will be possible to use a **fast acceptance of an order**
- It will be possible to **modify** an order, it will no longer be necessary to cancel it and submit a new one

## Financial security

- A new financial security principle for faster submitting of orders

## Trading screen

- A client application on the side of a market participant with a new form of the Trading screen

# OTE Testing with market participants

- **Testing** with market participants is expected to be **from 27th August to 7th September 2018**.
- The **OTE-COM application** and also AMQP automatic communication for the testing environment will be available on **10th August**.
- If a market participant will use automatic communications through the AMQP server, it will be possible to carry out **connectivity tests on the testing environment from 13th to 24th August 2018**.
- **Public certificates** are needed for access to the OTE-COM application and **qualified certificates** are needed for signing orders.

# OTE Preparation for Go-Live

---

- OTE-COM to be launched during the night **from 25. 9. to 26. 9.**
- Cooperation from Market Participants is needed
  - **Connectivity tests on production environment** are available **from 17. 9. to 21. 9. 2018**
  - **OTE-COM Luncher Manager** to be available **to download and install on Market Participant's local station from 14. 9.** (*probably Admin rights are needed*)
  - Inform OTE (via email [market@ote-cr.cz](mailto:market@ote-cr.cz)), if you want **to set** by OTE initial value of **IM limit**, to be able to trade immediately after Go-Live, and please let us know **the value** you want to transfer **to IM limit by 20. 9. 2018.**

## Cutover plan for OTE-COM go-live (Transition from current trading to OTE-COM based trading)

---

- On 25th September **will not be opened the market for Gas Day D + 1 (product G-DD180926)**, after Regular System Shutdown it will be opened in the new module
- **All non-traded orders (product G-DD180925) will be canceled**, during the Regular System Shutdown (25. 9. from 5 pm), on the Gas IM market **for Gas Day D**
- **The final aggregation of trades** on the Gas IM for the gas day D **will be made** during the Regular System Shutdown, **including the final nomination of the trading results** to the nomination module for Gas Day D
- **OTE-COM trading starts (contract IM\_26092018)** after the Regular System Shutdown, orders and trades on the Gas Day D + 1 will be secured in a new form – in **IM limit** (orders) and in the Main Limit (trades).

# Thank you for your attention!
